

DESCRIPTION

Everything about Inline's ISTE Pig is designed with extreme duty in mind. The tough, replaceable cups and discs are made exclusively of hard wearing Polyurethane, engineered Inline's proprietary system of custom urethane compounds formulated for severe pipeline conditions that destroy standard "off-the-shelf" urethane.

The ISTE Pig uses the patented, long-wearing DC™ Cup to provide the pipeline operator with the edge for long-distance runs. The DC™ Cup's hefty load-bearing capacity makes it possible to support even the heaviest of metal-mandrel pigs without the "nose-diving" effect common in standard cups.

For extra scraping, the ISTE Pig uses heavy duty flat wire HZ brushes that are mounted on spring-loaded arms to ensure constant contact with the pipe wall.

INTELLIGENT PIPELINE CLEANING
CORROSION CONTROL • DEWATERING • PIT CLEANING
